I SEDOL code	BG6LVT4
I ISIN code	GB00BG6LVT47

Fund manager's commentary

The Federal Reserve shifted inflation-targeting from 2% to a 2% average over time, suggesting US inflation may overshoot without triggering monetary tightening. In response, global bonds fell 2.13% in sterling, the dollar fell 1.98% against the pound while gold equities and gold fell 3.33% and 2.33% respectively in sterling. Global equities rose 4.06% in sterling, with US equities outperforming, up 5.07%, fuelled by technology sector strength. Among the EF Brompton Global Balanced Fund's global holdings, Polar Capital Global Technology and the technology-heavy Fundsmith Equity investment gained 6.26% and 4.22% respectively. Equities in emerging markets and Asia excluding Japan lagged, rising 0.22% and 1.53% respectively in sterling, but portfolio holdings in these markets outperformed. Baillie Gifford Pacific, Goldman Sachs Emerging Markets Equity and Morgan Stanley Asian Opportunity, which have growth investment styles, were added while Fidelity Asian Special Situations was sold. UK equities lagged, up 1.50%, but small stocks gained 5.40%. Among the portfolio's UK holdings, Chelverton UK Equity Growth rose 5.59%. Equities in Europe excluding the UK, up 2.23% in sterling, were held back by weak inflation data and a slowdown in economic recovery. BlackRock European Dynamic outperformed, rising 3.98%. UK inflation rose to 1.0% in July and UK government bonds and sterling corporate bonds fell 3.20% and 0.78% respectively. Among the bond investments, the sterling-hedged RWC Asia Convertibles holding rose 3.14% but the sterling-hedged Vanguard Global Bond holding fell 0.84%. The EF Brompton Global Balanced Fund rose 2.22%† in August while the sector rose 1.33%.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
