I SEDOL code	BG6LVP0
I ISIN code	GB00BG6LVP09

Fund manager's commentary

Global equity markets rose 2.52% in sterling, buoyed by expectations of an imminent Sino-US interim trade deal. US stocks outperformed, rising 3.67% in sterling. UK equities lagged, rising only 1.76% but smaller companies outperformed, up 4.77% as investors proved sanguine in advance of December's general election. The UK avoided a recession, with third-quarter gross domestic product rising 0.3% quarter-on-quarter according to the initial estimate. All six EF Brompton Global Conservative Fund holdings in UK equity funds outperformed because of their bias towards companies with greater sensitivity to domestic economic trends. Chelverton UK Equity Growth and Man GLG UK Income were the best performers, rising 5.70% and 4.49% respectively. Japanese equities also underperformed, rising 0.68% in sterling, but the portfolio's two Japanese equity holdings outperformed, with T Rowe Price Japanese doing best, up 4.43%. In Europe excluding the UK, where equity markets lagged, rising 1.48% in sterling, BlackRock European Dynamic outperformed, rising 4.29%. Global bonds fell 0.72% in sterling while UK government bonds and sterling corporate bonds fell 0.88% and 0.12% respectively but all but one of the portfolio's bond holdings generated positive returns because of their bias towards shorter-duration assets, with Schroder Strategic Credit doing best, up 0.61%. Gold fell 3.08% in sterling and the iShares Gold Producers exchange-traded fund was the portfolio's weakest holding, falling 4.07%. Five of the six alternative holdings posted gains, with the 3i Infrastructure investment trust doing best, rising 3.18%. The EF Brompton Global Conservative Fund rose 1.17%† in November while the sector gained 0.65%.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that no more than 35% of the total Fund will have exposure to equity markets, with the remainder of the portfolio providing exposure to assets such as alternatives, commodities, property, cash, cash equivalents and fixed income investments, in order to maintain its conservative risk profile. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 0-35% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
