Fund manager's commentary

Global equities rose 8.82% in sterling as the efficacy of three Covid-19 vaccines surpassed expectations. Cyclical stocks out-performed, contributing to a 13.15% rise in the EF Brompton Global Equity Fund's holding in the iShares World Value Factor exchange-traded fund (ETF). This holding was increased at the expense of growth-oriented investments. The other global investments lagged, with Fundsmith Equity and Polar Capital Global Technology gaining 4.88% and 5.22% respectively because of their growth bias while the iShares Gold Producers ETF fell 10.27% as gold fell 8.57% in sterling. US equities lagged, rising 7.45% in sterling, but Vulcan Value Equity outperformed, up 10.96%. UK equities rose 13.11% as cyclical stocks rose and EU trade talks appeared to progress. Within the portfolio, the value-oriented holding, Man GLG UK Income, outperformed, rising 19.52%, but Majedie UK Focus and Chelverton UK Equity Growth lagged, rising 11.02% and 11.69% respectively. Equities in Europe excluding the UK outperformed, rising 13.42% in sterling. BlackRock European Dynamic did better, up 14.07%, but Threadneedle European Smaller Companies lagged, rising 9.74%. In Japan, where equities rose 7.91% in sterling, all three holdings outperformed, with Comgest Growth Japan strongest, up 12.46%. Equity markets in Asia excluding Japan and emerging markets gained only 4.64% and 5.81% respectively in sterling. Within the portfolio, Baillie Gifford Pacific did best, rising 8.40%, but Morgan Stanley Asia Opportunity gained only 3.18%. The EF Brompton Global Equity Fund rose 7.61%† in November while the sector gained 9.07%.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes. The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

Investments will not be confined by industrial, economic or geographical sector. The Fund may hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Global. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
