### Fund manager's commentary

Risky assets rose as investors responded to Covid-19 policy responses from central banks and governments and signs that restrictions may ease in some countries. All EF Brompton Global Growth Fund holdings posted gains. Global equities rose 8.88% in sterling. Among the global equity holdings, the Polar Capital holdings, Healthcare Opportunities and Global Technology, outperformed, rising 19.45% and 13.52% respectively, but Fundsmith Equity lagged, rising 8.54%. All UK equity holdings outperformed the 3.36% rise in UK equities. Chelverton UK Equity Growth, which has a small-cap focus, did best, rising 14.95%, while Artemis UK Special Situations gained 11.97%. Japanese equities lagged, rising 3.56% in sterling, but T Rowe Price Japanese Equity and Comgest Japan gained 9.99% and 9.89% respectively. The third Japanese investment, the recently-launched Nippon Active Value investment trust, was substantially in cash and rose 0.50%. Among the alternative holdings, 3i Infrastructure and Trojan did best, rising 5.05% and 4.95% respectively. Sterling corporate and high-yield bonds and UK government bonds gained 6.29%, 4.63% and 3.15% respectively but global bonds rose only 0.23% in sterling, with returns held back as the euro and dollar fell 1.87% and 1.70% respectively against the pound. Investment in corporate bonds increased through the purchase of Henderson Fixed Interest Monthly Income. An extended period of low interest rates in response to rising government debt may favour nil-yielding gold and the iShares Physical Gold exchange-traded commodity was added. The EF Brompton Global Growth Fund rose 9.34%† in April while the sector rose 7.44%.

## Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
