B ISIN code	GB00BG6LVX82
I SEDOL code	BG6LVY9
I ISIN code	GB00BG6LVY99

Fund manager's commentary

Monetary policy tightened to combat inflation. The Federal Reserve and European Central Bank raised their official interest rates by three-quarters of a point and half a point respectively in July and the Bank of England raised rates by a half point in August, forecasting 13% inflation and a fourth-quarter economic contraction. Global equities and global bonds rose 6.80% and 1.92% respectively in sterling because signs of weaker economic activity might result in interest rates peaking sooner than anticipated. Global growth stocks outperformed, up 9.95% in sterling, fuelled by the US technology sector's 11.59% rise. Among the EF Brompton Global Growth Fund's growth-oriented holdings, Martin Currie European Unconstrained, Polar Capital Global Technology and Baillie Gifford Japanese Smaller Companies did best, up 13.93%, 10.18% and 9.26% respectively. By contrast, value-oriented holdings such as the iShares Edge World Value exchange-traded fund (ETF) and Lightman European lagged, gaining 2.76% and falling 2.28% respectively. Amongst defensively-positioned global equity holdings, the Xtrackers MSCI World Health Care ETF and Polar Capital Global Insurance also underperformed, gaining 3.05% and falling 0.87% respectively. In response to the weakening gold price, the iShares Gold Producers ETF did worst, falling 4.17%, while the iShares Physical Gold exchange-traded commodity fell 3.70%. Bond investments outperformed, with Schroder Strategic Credit doing best, up 3.02%. Alternative investments made gains, with Man GLG UK Absolute Value doing best, up 3.75%. In property, Balanced Commercial Property gained 7.93%. The EF Brompton Global Growth Fund gained 2.10%† in July while the sector gained 3.48%.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
