### Fund manager's commentary

Global equities rose 1.00% in sterling despite the failure of three smaller US banks and UBS's state-sponsored rescue of Credit Suisse, a systemically-important institution, which showed the cumulative impact of rising interest rates on the banking system. Investors inferred peak rates might be close-at-hand. Global bonds rose 1.01% in sterling while UK government bonds returned 3.03%. Within the EF Brompton Global Growth Fund, the sterling-hedged holding in Vanguard Global Bond, which holds sovereign bonds, rose 2.31% but Schroder Strategic Credit, which holds corporate bonds, fell 0.51%. The Bank of England raised Bank rate a quarter percentage point and lifted its economic forecast. UK equities fell 3.12% because of London's bias towards the economically-sensitive financial and energy sectors. Within the portfolio, Man GLG Undervalued Assets and Man GLG Income fell 6.54% and 5.75% respectively but Liontrust Special Situations, a growth-oriented investment, fell only 1.43%. Smaller companies lagged, down 5.61%, and Aberforth UK Smaller Companies and Chelverton UK Equity Growth did worse, down 6.42% and 6.35% respectively. Gold, as a safe-haven asset, benefitted from banking sector woes, and the iShares Gold Producers exchange-traded fund and the iShares Physical Gold exchange-traded commodity gained 14.70% and 6.23% respectively. The portfolio benefitted from its relatively-high weightings in Japan and Asia excluding Japan, up 1.92% and 1.35% respectively in sterling. Lindsell Train Japanese Equity was the best Asian performer, up 2.06%, while Man GLG Japan CoreAlpha was the worst, down 2.33%. The EF Brompton Global Growth Fund fell 0.92%† in March while the sector fell 0.82%. Financial data source: Refinitiv 31 March 2023. † B Acc shares

## Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
