I SEDOL code	BG6LVY9
I ISIN code	GB00BG6LVY99

Fund manager's commentary

Global equities and bonds fell 0.19% and 0.11% respectively in sterling. US inflation was 8.3% in April while UK inflation was 9.0%. The Federal Reserve and Bank of England raised their policy interest rates by a quarter-percentage point and half a point respectively. Value stocks extended gains, rising 1.66% in sterling while growth stocks fell 2.32%. The iShares Edge MSCI World Value exchange-traded fund (ETF) and Lightman European, another value-oriented holding, were added to the EF Brompton Global Growth Fund portfolio while two growth-oriented holdings, BlackRock European Dynamic and T Rowe Price Japanese Equity, were sold. The Xtrackers MSCI World Health Care ETF proved resilient, rising 0.13%, and Polar Capital Global Insurance was added. Companies in sectors such as healthcare and commercial insurance benefit from relative price-inelasticity because of the low substitutability of their products and services. UK equities outperformed, gaining 0.80%. Within the portfolio, Artemis UK Special Situations, Man GLG Undervalued Assets and Man GLG Income outperformed, rising 4.19%, 3.62% and 2.91% respectively because of their bias towards value stocks. By contrast, Aberforth UK Small Companies and Liontrust UK Special Situations, a growth-oriented investment, fell 2.93% and 1.07% respectively. Oil rose 10.79% in sterling and BlackRock Natural Resources Growth & Income benefited, up 6.00%. The 3.97% fall in the gold price in sterling led to falls for the iShares Gold Producers ETF and the iShares Physical Gold exchange-traded commodity of 9.91% and 4.17% respectively. The EF Brompton Global Growth Fund fell 0.48%† in May while the sector fell 0.88%.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
